

PRODUCTION SPRINT

Fix one expensive workflow. Measure the result.

Reduce manual effort, billing gaps, or processing delays in one expensive workflow. We redesign the process around AI and automation, put it into daily use, and measure the operating result.

A FOCUSED PATH TO WORKING VALUE

ONE

tightly scoped production workflow

4-6 WEEKS

delivery window after kickoff

\$40K-\$75K

fee and timing subject to agreed scope and access readiness

Good starting points include billing reconciliation, collections, document processing, intake, and exception handling. We agree the baseline and production scope before kickoff.

SCOPE A PRODUCTION SPRINT

lassov.com/production-sprint

ONE ACCOUNTABLE PRODUCTION PATH

01

BUILD

Redesign and implement the production workflow, human and AI roles, integrations, controls, and exception paths inside the agreed boundary.

02

PROVE

Validate acceptance metrics, test failure modes, and establish the measured post-launch review before release.

03

EMBED

Roll out with communication and training, assign an accountable owner, and complete the operating handoff.

WHAT THE CLIENT RECEIVES

- **PRODUCTION WORKFLOW**
Working flow inside the agreed boundary
- **INTEGRATIONS + CONTROLS**
Connected systems, safeguards, exceptions
- **ACCEPTANCE METRICS**
Observable release and operating measures
- **ROLLOUT + TRAINING**
Adoption plan, communication, user readiness
- **OWNER + HANDOFF**
Accountability, runbook, support boundary
- **POST-LAUNCH REVIEW**
Measured performance against the baseline

WHEN SCOPE IS UNCLEAR

A Workflow Scan is an optional readiness path only when production cannot be responsibly scoped from the evidence available.
